Up to 8hrs long lasting rechargeable lithium-ion battery
Pocket friendly form
Aux-in socket
Shock absorbing silicon body
Integrated carry cord

Box contents:
NudeAudio Move M
USB charging cable
User manual

Extended Copy

Introduction:
The Move M Bluetooth speaker has a larger ported acoustic chamber than its Move S wireless cousin; so naturally, the sound is heftier, too. Not to get too technical on you, but the bass-to-size ratio is going to give you the biggest bang for your buck when playing music, video, games or apps out loud, via Bluetooth. Just about the size and weight of an average wallet, this really is the go-anywhere, do-anything speaker with audio chops to match. Stream audio to this speaker from any Bluetooth-enabled device, for 8 hours of non-stop entertainment for your ears.

Wireless Music
3.0 Bluetooth wireless streaming technology provides a range of up to 10 meters or 30 feet. Good to go with most smartphones, tablets, laptops and other Bluetooth-enabled devices, including the iPhone, iPod and iPad.

Easy setup
You need to pair your device only once with the Move M, and it takes just a few seconds. The Move M Bluetooth speaker will remember up to 8 devices and reconnect with the touch of a button.

Speakerphone
A high-fidelity dual-microphone system also turns this Bluetooth speaker into a portable speakerphone for hands-free calling and conference calls straight from your smartphone. And if you keep in touch via Skype™ or FaceTime™ or other video chat services, you can use it to video call too.

Wireless control
Once a device is paired, you have complete control of your music from the palm of your hand — play, pause, fast-forward, rewind, or skip a track using your media player.

Long-lasting rechargeable battery – The built-in high performance Lithium-ion battery can be charged from any USB source and will retain up to 50% of its charge for 3 months. The LED light and notification sounds will also alert you when the speaker is running out of power.

Full range sound - The Move M Bluetooth speaker redefines the meaning of high-quality portable audio. The tapered bass port and the NudeAudio know-how deliver an audio performance with a distinct punch and an impressive bass for a speaker this size.

Designed to move - A thick, protective silicon sleeve is smooth to the touch, making these Bluetooth speakers feel at home in your hand while also defending against knocks or bumps. A nylon carrying cord makes the Bluetooth speaker both portable and versatile — hang it, clip it, toss it, lean it or lay it flat.

Compatibility:
Available in grey and mint or charcoal and coral, the Move M by NudeAudio is compatible with smartphones, tablets and other devices that support Bluetooth wireless audio profile [Advanced Audio Distribution Profile (A2DP)] or have a 3.5 mm audio output. Speakerphone functionality is compatible with Phones that support Bluetooth® Hands-Free Profile (HFP1.5)

Dimensions
The Move M is lightweight and compact with dimensions of 98x98x39mm and weight of only 198g or 6.98 ounces.
